

REQUIRED BUILDING PERMIT INSPECTIONS

All Building Permits issued by the City of Harrisburg are required to have periodic Inspections as set forth by the attachment. Please contact our office at 255 - 6552 with a minimum twenty-four (24) hour notice for the applicable inspections. Not all permits will be required to have all the inspections listed. The extent of the work to be conducted will dictate the inspections required.

INSPECTIONS LIST

- | | |
|--------------------------|---|
| 1) Initial Inspection | An initial inspection will be conducted to evaluate the extent of work and materials on the job early into work in progress. |
| 2) Footing | After excavation and any and all reinforcement is installed. <u>Prior to pouring concrete.</u> |
| 3) Foundation | After foundation is installed. parging, waterproofing and insulating is complete. <u>Prior to backfill.</u> |
| 4) Concrete Slab | After sub-grade, reinforcing, expansion joint material, control joint material and reinforcement is installed. <u>Prior to pouring concrete.</u> |
| 5) Rough Framing | After all framing members, fire blocking, draft stopping is installed. <u>Prior to installing any finish material.</u> |
| | Note: Before a rough framing inspection can be conducted any electrical work must have a third party rough electrical inspection completed and sticker attached. Any plumbing work must have a rough plumbing inspection completed. |
| 6) Rough Electrical | The licensed electrician is responsible for contacting the inspection agency they work with and arranging for the inspection |
| 7) Final Electrical | The licensed electrician is responsible for contacting the inspection agency they work with and arranging for an inspection of their work. The agency will attach a final sticker to the electrical panel box, including the electrical permit number. The City Inspector will conduct an inspection at the time of the final inspection (# 11). |
| 8) Rough Plumbing | The licensed plumber is responsible for contacting the City Plumbing Inspector to arrange for the inspection. |
| 9) Final Plumbing | The licensed plumber is responsible for contacting the City Plumbing Inspector to arrange for a final plumbing inspection. The Plumbing Inspector will conduct the inspection at the time of the final inspection (# 11). |
| 10) Sprinkler Inspection | The licensed sprinkler contractor is responsible for contacting the Harrisburg Fire Bureau to arrange for the inspection and test. Test results to be submitted to the Assistant Codes Administrator. |
| 11) Final Inspection | A final inspection is required for ALL permits issued. This inspection is conducted after all other inspection have been completed. At or before the final inspection copies of all As-Built drawings, soils tests, concrete tests, and verification of previous inspections are required. If the inspection is passed and if required to have a Certificate of Occupancy, one will be issued. If the inspection fails the items noted on the inspection report must be rectified prior to a C.O. being issued. |

12) Sidewalk

Inspection

An inspection is required after excavation, form work is installed and all reinforcement is installed (where necessary) - Prior to pouring concrete.

13) Curb Inspection

Curb inspection will require a Street Cut Permit issued by the Office City Engineer. An inspection, conducted by the Bureau of City of Harrisburg Engineer, will be required after excavation and form work is installed. Prior to pouring concrete.

14) Permit Card

Collection

The permit card will be retained by the City for all permits issued and will be filed as part of the City Property Record after the job is complete and all inspections are passed.
